INFO100 Mandatory Assignment no 10

Svart = riktig

1. **What are components of computer networking? Figure is just for illustration/ reminder.**

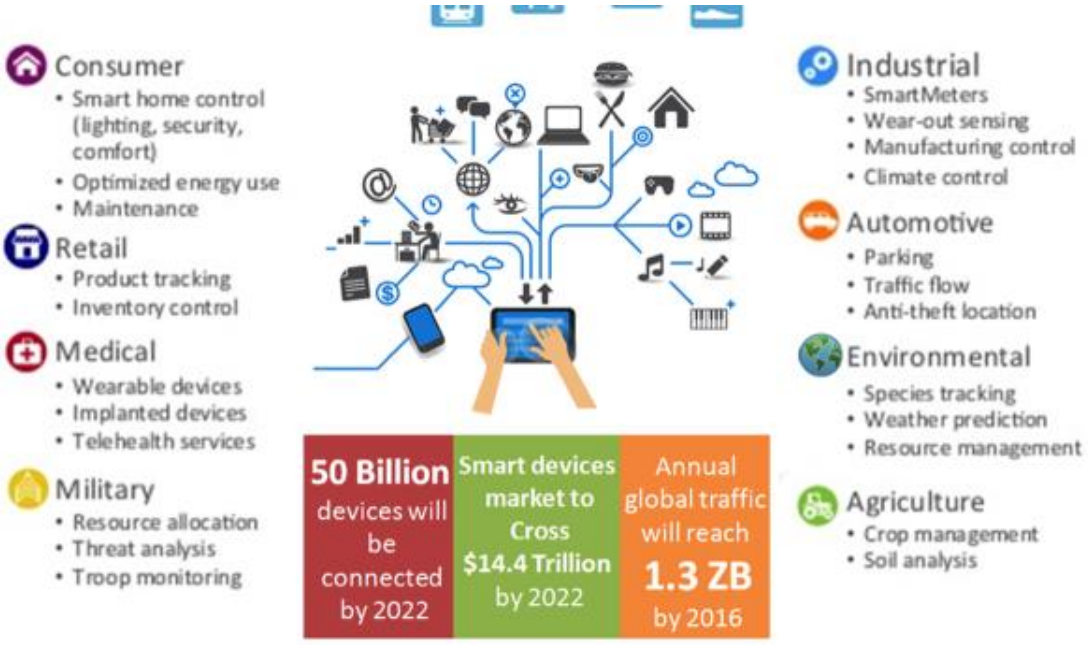

a. network infrastructure, protocols, computers, modems/routers

b. use of physical network infrastructure (switches, routers and wireless access points, underlying firmware that operates such equipment), the software necessary to monitor, manage and secure the network; use of standard protocols to uniformly perform discrete functions or communicate different types of data, regardless of the underlying hardware.

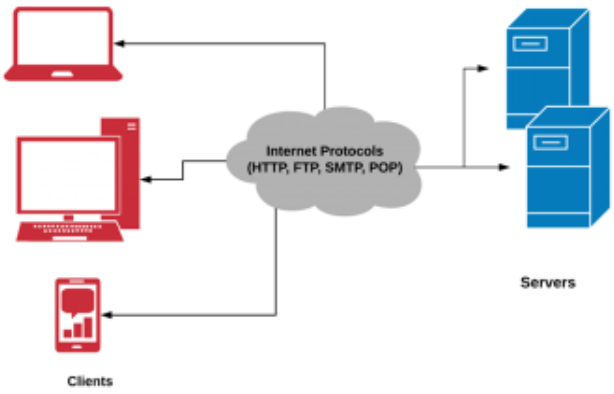

c. computers, routers, modems, bridges, SW, protocols

2. The figure below is presenting:

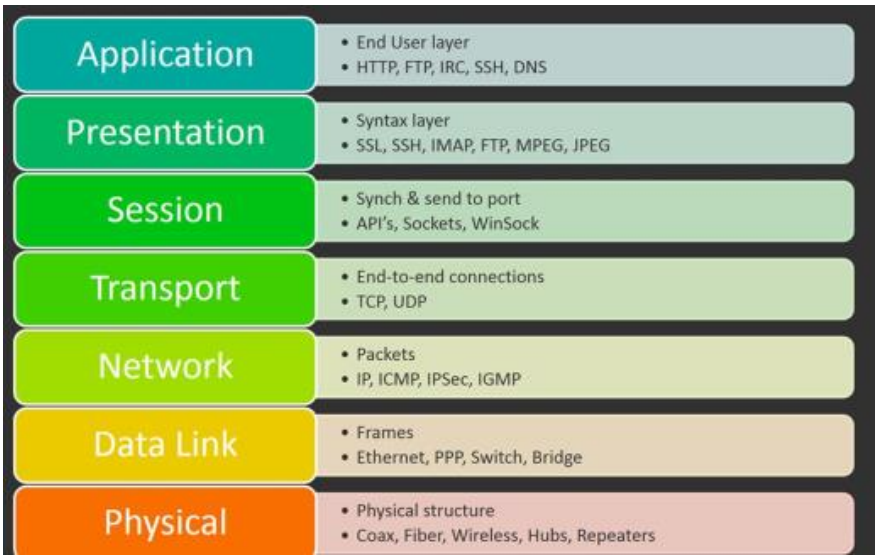

a. Computer networking
b. Commercial applications based on communication protocols
c. Internet of Things

3. The figure below presents

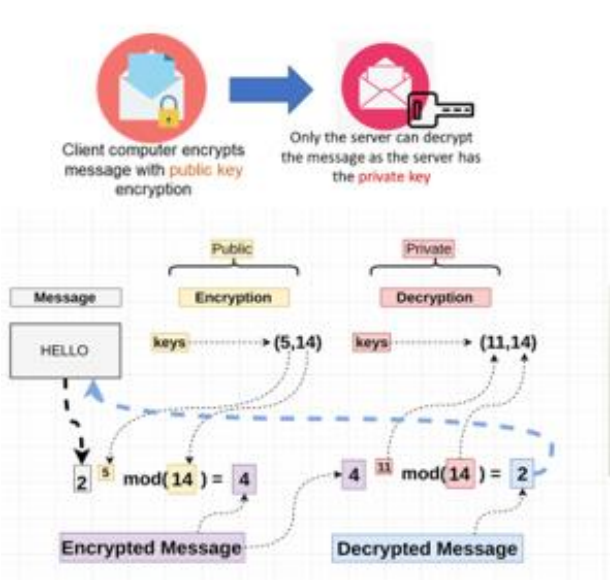

a. Internet of Things
b. Wireless Networking
c. Hypertext Transfer Protocol

4. The figure below presents:

a. Web-based network
b. Communication protocol structure
c. OSI model

5. The figure below presents

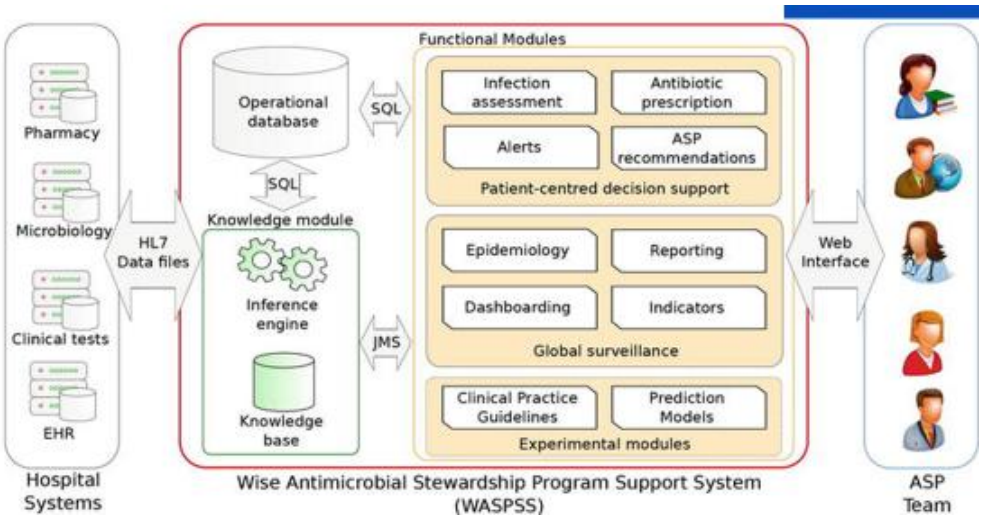

Leonhard Euler

a. An example of Turing machine
b. HTTPS with Public key encryption
c. A communication protocol.

6**. The below presented system is an example of:**

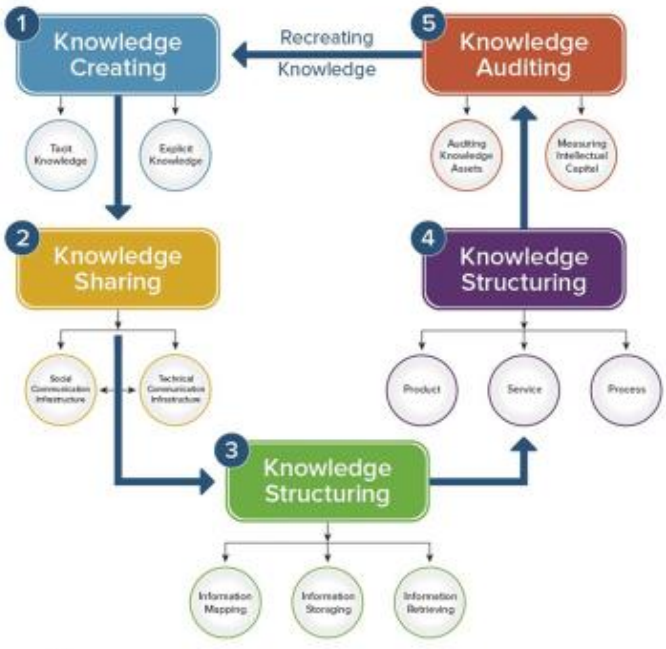

a. Transaction information system

b. Decision support system

c. knowledge management system

7. The below presented system is an example of:

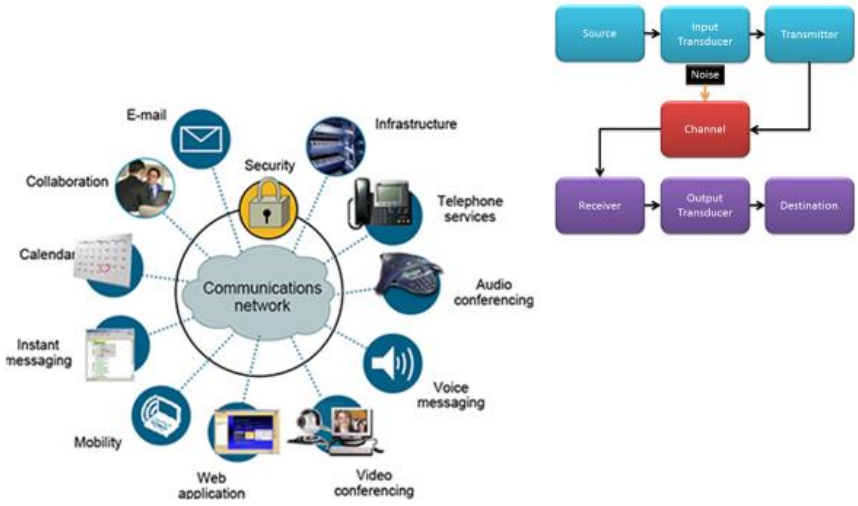

a. Transaction information system

b. Decision support system

c. Knowledge management system

8. The below presented system is an example of:

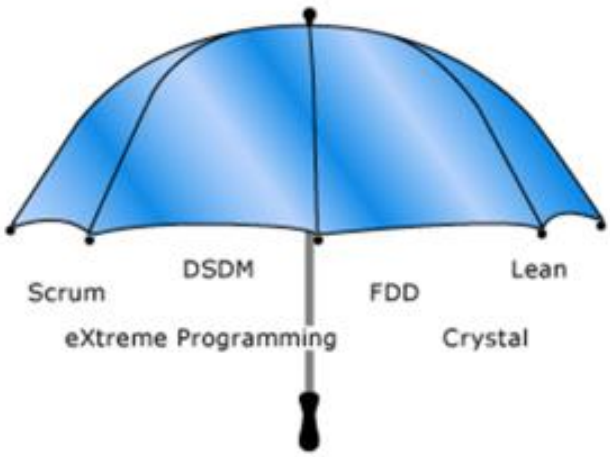

a. Transaction information system

b. e-commerce information system

c. Data management system

9. Why are AGILE methods presented symbolically even with an umbrella?

a. They are suitable for developers working in places where it rains a lot.

b. It is a term used to illustrate a group of methods sharing the same features, that are not of the same background.

c. They are easy to start with as opening an umbrella.

10. What kind of system development method is presented below?

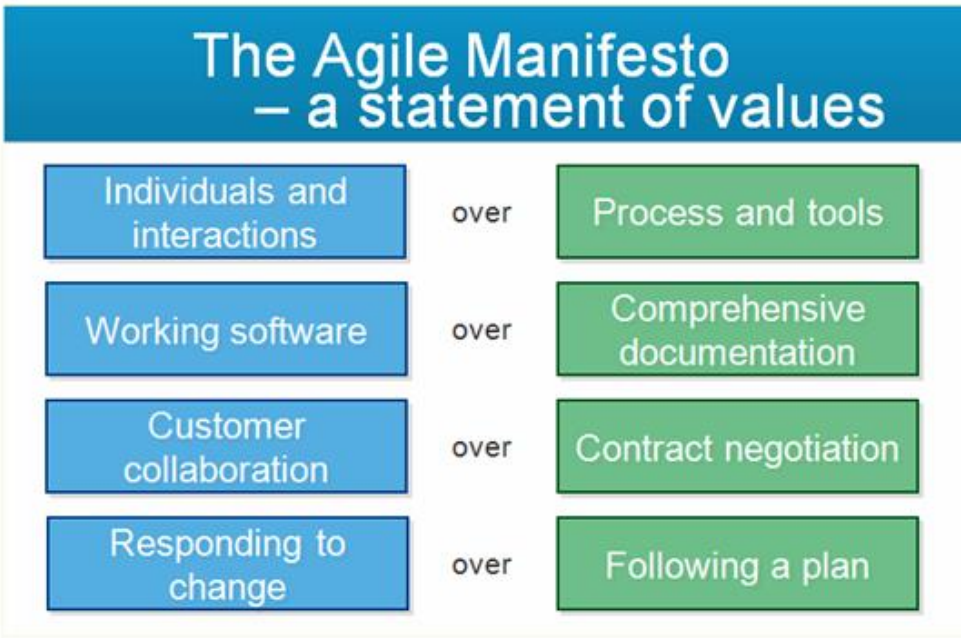

a. Spiral

b. Agile

c. Rapid

11. What is the Agile Manifesto suggesting?

a. Potential weaknesses of the Agile system development.

b. Possible ways to start a project when limited resources are available.

c. Advise to be flexible when developing systems to maintain time limits.

12. The office space below is characteristic of

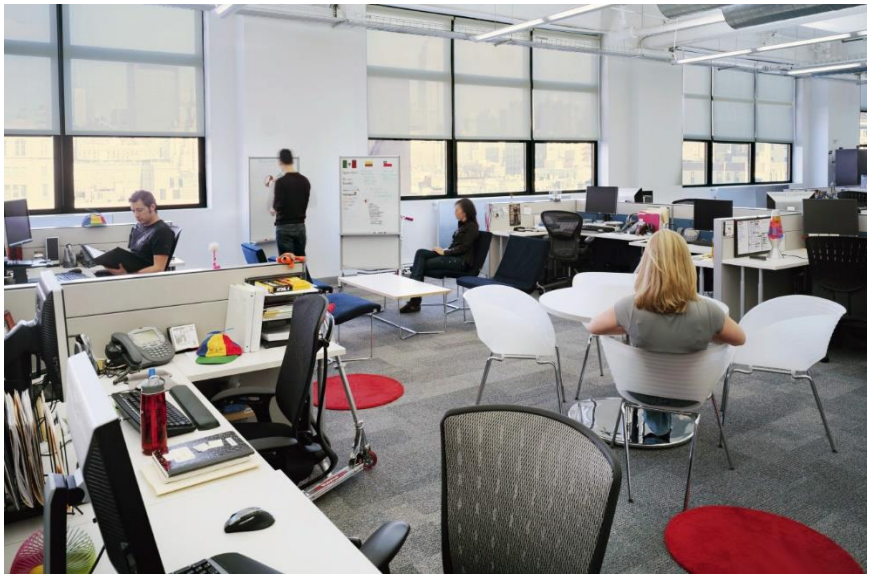

a. Traditional system development

b. Agile system development.

c. Could be both traditional and agile system development.

13. The office space below is characteristic of

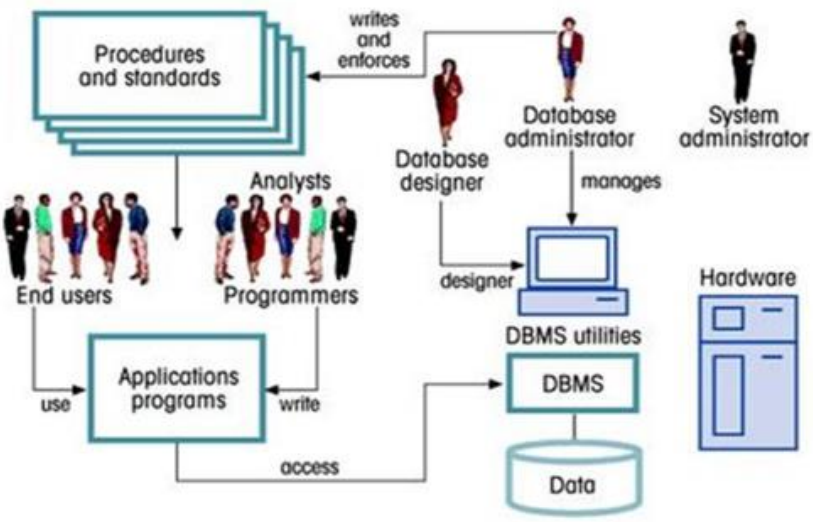

a. Traditional system development

b. Agile system development.

c. Could be both traditional and agile system development.

14. The figure below is presenting

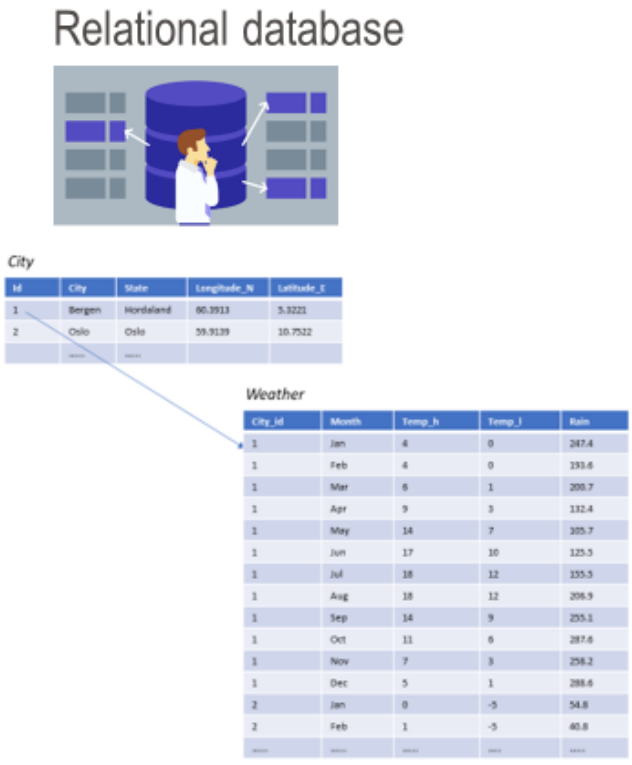

a. Everything and everyone who is controlled by database management system (DBMS).

b. Database system environment with all its key elements and people.

c. Mainly hardware and software in a database system.

15. The figure below is showing

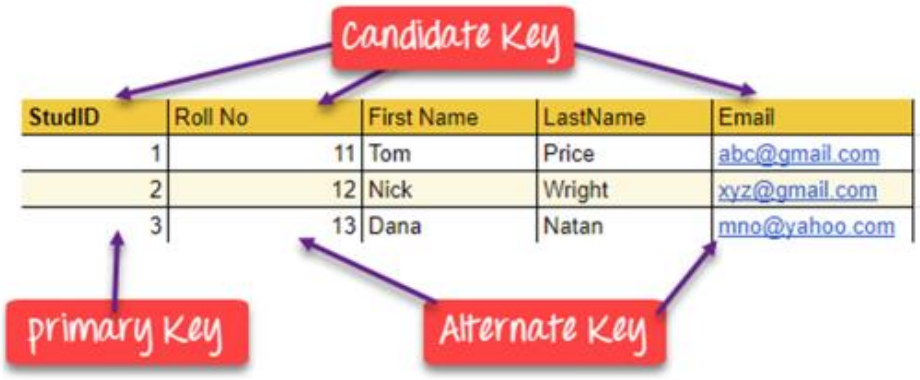

a. A confused user not understanding the query results.

b. How to use the keys in a database.

c. Relational database (tables + relations)

16. What is a primary key?

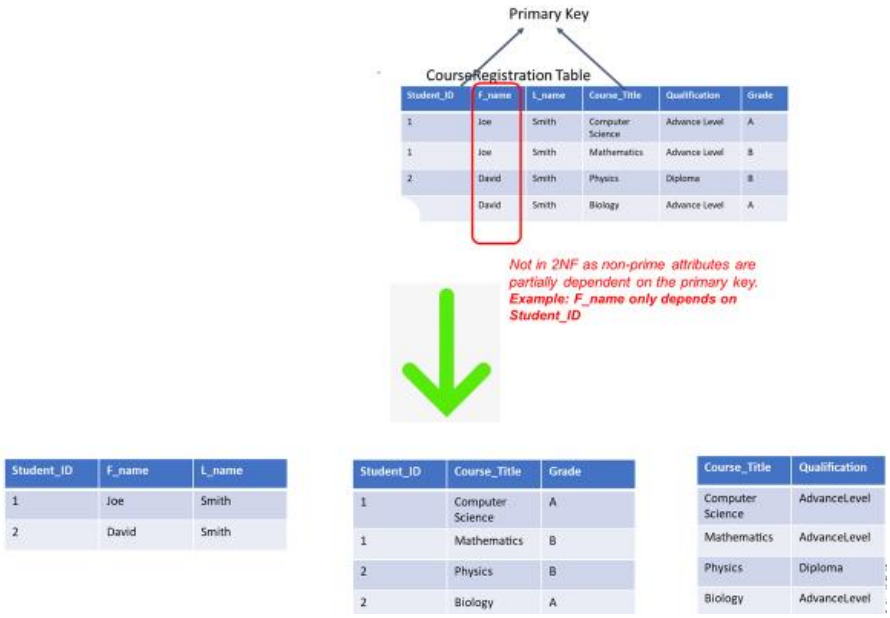

a. It is an ID of a person or an object.

b. It is a is a group of single or multiple keys which identify rows in a table (this is a super key).

c. It is a column or group of columns in a table that uniquely identify every row in that table.

17. When data is directly accessible, simplified, with no redundancy, we say it is:

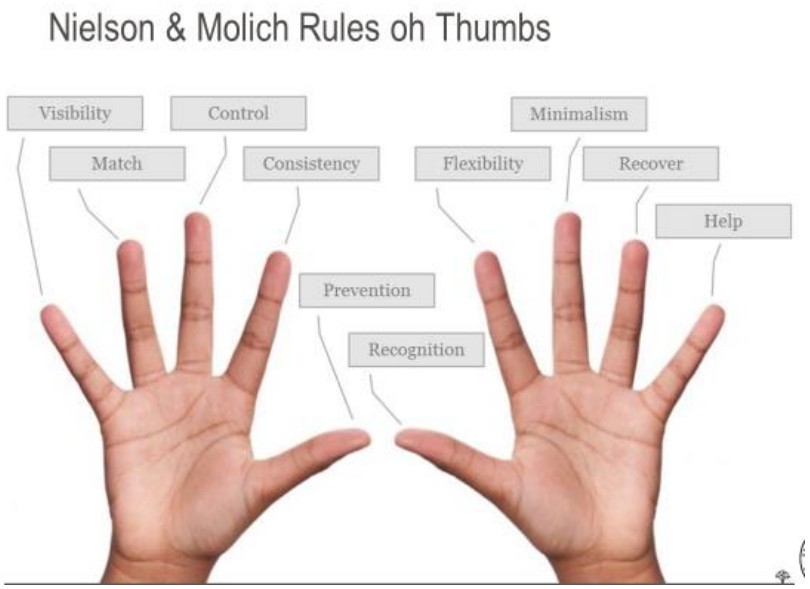

a. Organized according to the international standards

b. Normalized

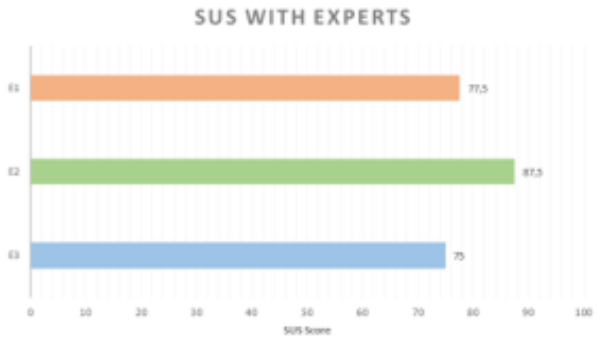

c. Acceptable to the final user.

18. The figure below is showing

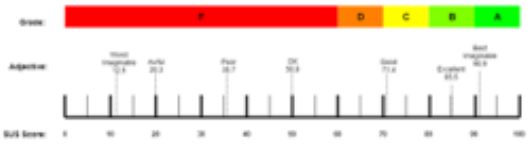

a. System Usability Scale (SUS)
b. What the system developer and designers should be trained at
c. The heuristics used to obtain user feedback on the system they are developing.

19. The results of the system usability testing are showing three usability scores. They are:

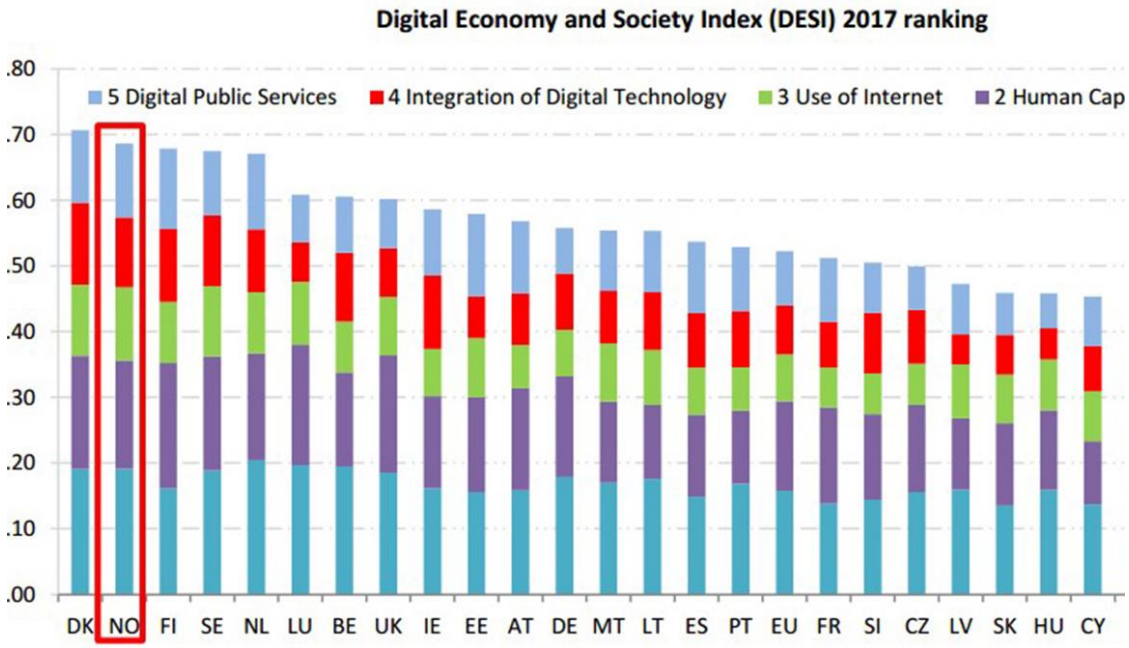

Usability Experts
- Came to UIB
- 1 female and 2 males

Main feedback
- Unfinished functionalities

a. Unacceptable (under average expected value, i.e. 70)
b. Average
c. Average to very good.

20. According to DESI report on digitalization in Europe (2017 report), Norway is

a. Better than Denmark
b. Better than Sweden
c. Worse than Finland
